

European Standardization Organizations

# The future of standardization of construction products

Elena SANTIAGO CID, Director General

# European Standards: a **key tool** in **EU economy recovery and resilience**

- ▶ Facilitate the **Single market**
- ▶ Contribute to **Recovery Plan for Europe**
- ▶ Support EU **Twin Transition Digital & Green**

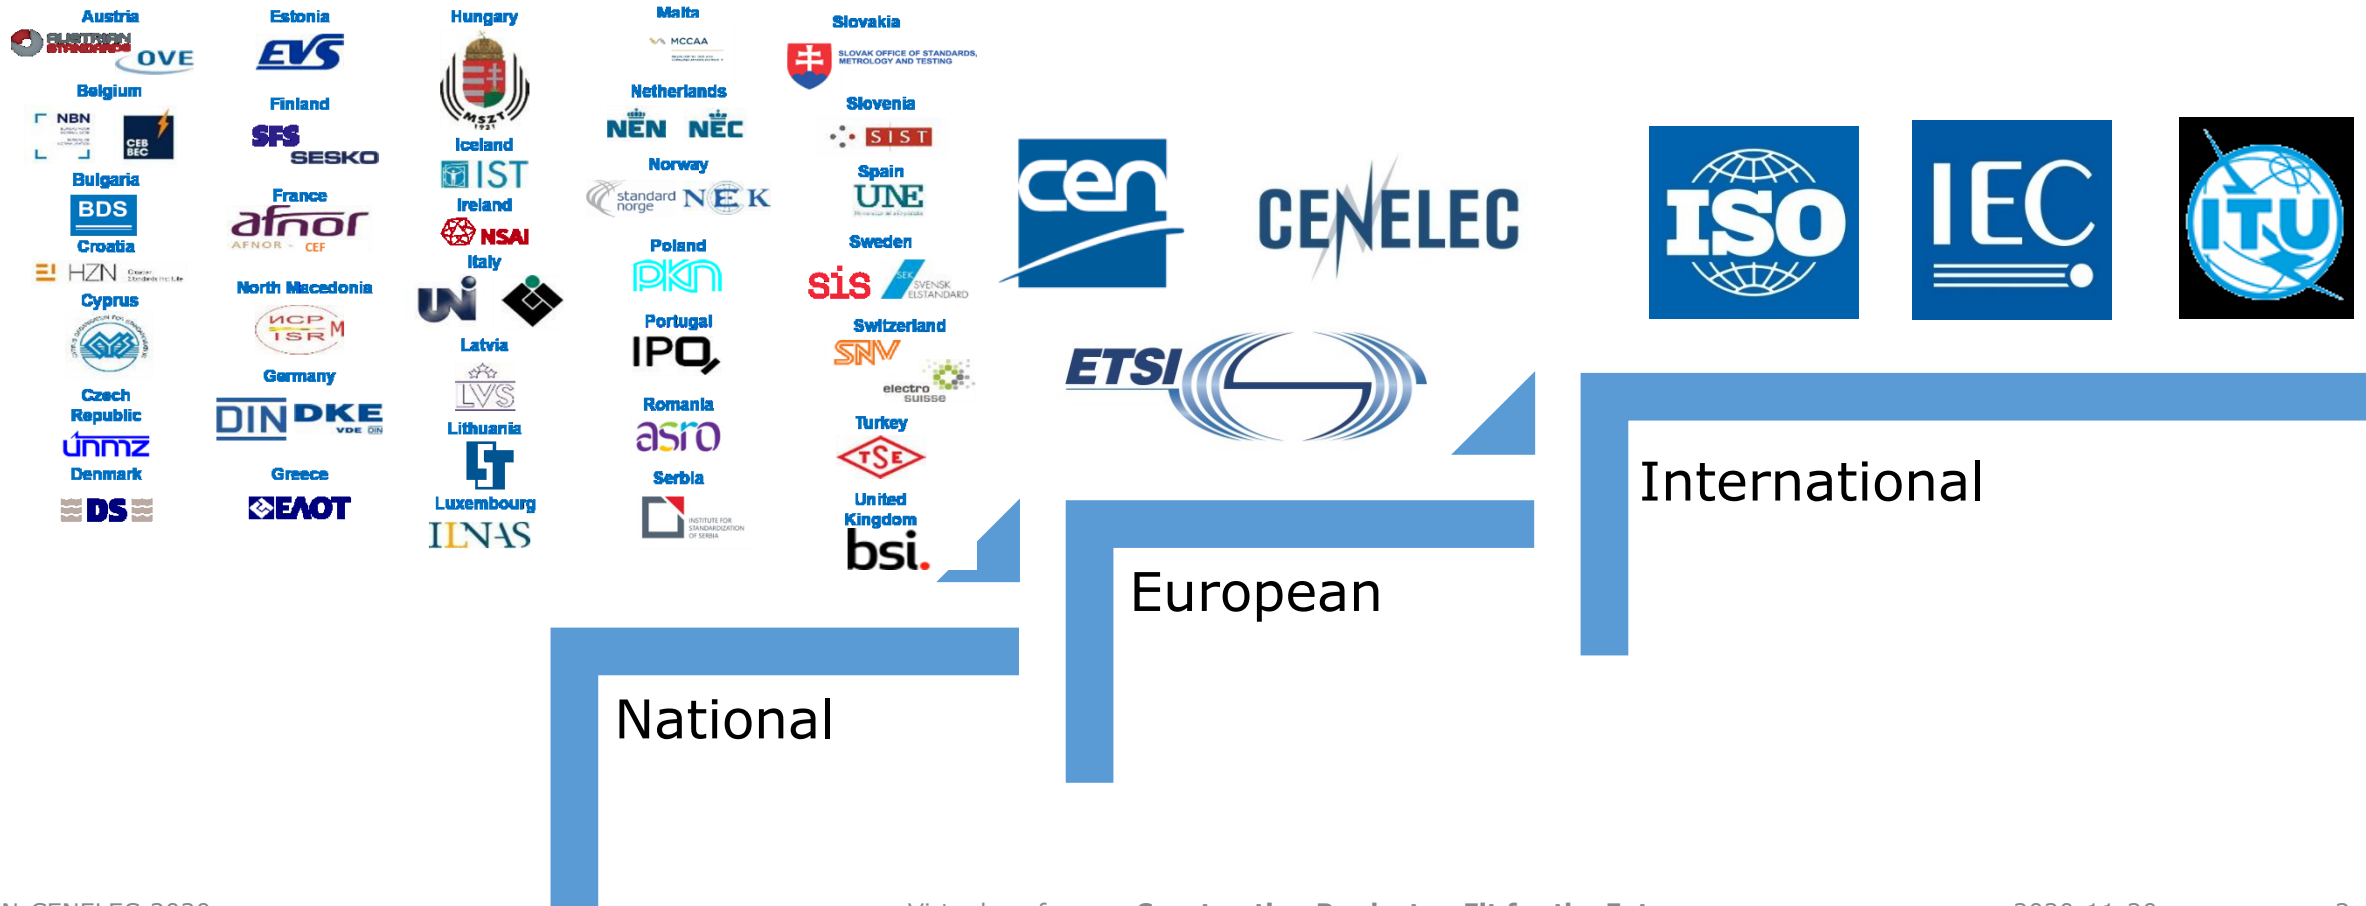

## **CEN-CENELEC Strategy 2030**

# The European Standardization System:

Inclusive, transparent and voluntary since 60 years  
Interacting with national and international levels

# European Standards: a key role in **Construction** sector

- ▶ **Safety** and **quality** of products
- ▶ **Removal** of **barriers for trade**
- ▶ **Common technical language**
- ▶ **Sustainable solutions**

3 200 European Standards, among which  $\pm$  400 harmonized ENs  
16 000 national adoptions of ENs outside Europe

# CPR – Glass half full or half empty?

- ▶ Very **low number of citations** in OJEU
  - **Setback** in a sector essential for revival of economy
- ▶ Need for **state-of-the-art harmonized Standards**
  - ▶ Smooth transition from Mandates to Standardization Requests
  - ▶ Clear and stable guidance on requirements
  - ▶ Consistency and alignment of European Policies and legislation
- ▶ Assess **the cost of no-Standards** for SMEs

# Revision of CPR

- ▶ **Standards** shall remain the main pillar of the new system
- ▶ **Industry** (big and small) shall remain strongly involved in the development of harmonized technical language

# Let's build together on a European success story!

The European Standardization System is unique in the world

Let's build together on a European success story to further develop the Single Market of Construction Products **effectively** Green and Digital, with European Standards
